The Brand that packs a punch!

www.juratek.com

Juratek brake pads and discs already punch above their weight, enabling you to successfully compete against all aftermarket brands.

From Autumn 2014 we are adding new features which will further enhance our product.

■ **New packaging**
stronger and more attractive.

■ **Painted discs**
an anti-corrosion paint will be applied to the non-braking surface of all brake discs across the range.

■ **Initial performance strip**
added to all brake pads, this strip improves the performance of the brakes during the initial running-in period.

Juratek, arguably the country's fastest developing brand for profitable, quality braking solutions.

These new features will become available as old stocks are exhausted.
