

Not all airbags are created equal...

...some are better than others

Take one leading Air Spring company, famous for it's pioneering new technology and tailor made engineered solutions. Add the World's leading supplier of quality aftermarket air suspension products with a purpose built plant focused on excellence. The result is Vibracoustic CV Air Springs, an Air Spring company uniquely positioned to serve the needs of commercial vehicle air suspension customers worldwide.

Headquartered in Hamburg, Germany, our engineering teams have many years experience in product design, in fact we can trace our origins directly back to Europe's first ever commercial vehicle Air Spring manufacturer. Our flagship production plant in Bursa, Turkey, was purpose built for Air Spring manufacture, ensuring quality products at every stage.

Reliability is very important to us. It's something the Blacktech brand promises to provide to thousands of drivers around the World every year. The modern plant in Bursa, is now a primary manufacturing facility producing more than two million Air Springs a year.

Blacktech air springs are exclusively available from
