Approved Distributor

of Juratek Braking for Passenger Cars & LCV

Precision Machined
Using Computerised Lathes

Clear Identification
Juratek brand mark, Part Number & Batch Code

Quality Tested
All parts are produced to exacting standards and are quality tested before supply using our CMM measuring machine.

Vent Design as OE
All parts designed to match the OE design using the latest CAD design software

Coated Discs
Anti-corrosion paint applied to non braking surfaces

Premium Shims
Rubber-Metal-Rubber for added noise absorption

Initial Performance Strip
The Initial Performance Strip is added to all brake pads. This strip improves the performance of the brakes during the initial running-in period.

Approved to AK Master
OE Type approval test for performance, wear and noise.

ECE R90 Approved Friction Material
European quality standard covering performance, fade, mechanical properties and conformance of production.
